

Superior Cameras for Veterinary Market

The most versatile solution for non-interruptive
communication, documentation and education.

vetCam 

Share your vision

Videos help veterinarians in giving modern, high-quality and customer-oriented health and medical care to animals. vetCam offering is a fully integrated solution including both hardware and software, which enables an enhanced and seamless workflow for taking photos and videos without interrupting treatment processes at all.

It is the most comprehensive way to store, review and share cases from treatments to off-clinic treatment plans as well as to preventive and proactive instructions to owners of animal patients.

Video is also important part of veterinary education today due to its easiness to show cases and techniques, share videos with your colleagues or give presentations in seminars, universities or training courses and events.

Camera solutions for communication and documentation

FOR Lights

FOR Loupes

FOR Microscopes

smartCam

Autofocus 4K camera for treatment/overhead lights

Our first 4K auto focus camera is designed especially for optimal light mount performance. The fast auto focus and pristine image quality with a Sony IMX415 sensor allows for even easier operation. smartCam is a great choice for high level documentation, communication, and live streaming for ie. educational cases.

proCam XS

Manual focus 4K camera for loupes and headbands

A miniature size camera with giant 4K features for loupe, headband or treatment light mounting. proCam XS is half the size of the previous generation and boasts a Sony IMX 415 sensor for pristine video and still images, weighs only 14 grams, with manual focus to ensure 100% clarity

Customized attachments for loupe brands such as:

Designs for Vision, Exam Vision, Heine, Keeler, Merident, Orascoptic, Pentax, Perioptics, Q-Optics, Surgitel, Univet, Zeiss, etc.

and for headband brands such as:

novoCam, Dr. Kim, Enova Illumination, Heine, Integra, etc.

scopeCam

4K C-mount camera for microscopes

Connect your scopeCam to any microscope with a C-mount beam splitter to capture your view. Use your scopeCam hands-free with your computer to capture high-res videos and still pictures for documentation, communication and education.

C-mount adapters

Available from microscope manufacturers. novoCam will also provide some C-mount adapters (Zeiss, Global and Zemax).

Mounting options

Loupe mount

- > POV - Matches the point of view of the loupes
- > Focus set to match loupe working distance (all-in-focus)
- > Hands free operation
- > Attachments to most loupes on the market

Light mount

- > Always ready to use
- > Instant images and videos with the foot pedal
- > Stable images and easy to use
- > Can be installed on most lights on the market

Microscope

- > Always ready to use
- > Hands-free operation by foot pedal without interruptions
- > Fluent workflow for documenting and sharing
